YARIS

YARIS

OVERVIEW

Small in size. Big in personality. The Yaris is a zippy city runabout, boasting poppy colours and a sharp-looking exterior with the right amount of attitude. Hop in and you'll soon find that there's even more personality on the inside.

YARIS

PERFORMANCE

Powered by fun

The Yaris packs a lot of punch into a small, lightweight car. New engines and suspension in both the GX and ZR make it a pleasure to drive, in and around the city. Nice touches like paddle shifters on the ZR petrol give you more control. But it's the combination of the chassis, engine and suspension design of the Toyota New Global Architecture platform that really gives the Yaris its bubbly personality, making it more agile, zippy, and fuel efficient. It's a car that loves a cheeky drive as much as you do.

The Yaris is available in two different powertrains, with both engines balancing performance and fuel efficiency in their own way. First is the Hybrid engine, available for both the GX and ZR. It's Toyota New Zealand's most efficient self-charging hybrid electric vehicle, sporting class leading fuel consumption* with a combined fuel consumption of 3.3L/100km** and CO₂ emissions of 76g/km. Incredible. Then there's the petrol engine, again available in both grades with a not-to-be-sneezed-at 4.9L/100km** combined fuel consumption. Spend less on fuel, splurge more on whatever you feel like.

* Based on manufacturer data. Class as defined by the VFACTS light passenger vehicle classification (excluding electric vehicles).

** Fuel Consumption figures are tested under controlled conditions and are provided for comparison purposes, actual results will vary according to vehicle usage and operating conditions.

YARIS

SAFETY

It's hard to have fun without peace of mind, which is why all Yaris Hatch models feature the latest in Toyota Safety Sense technology.

Toyota Safety Sense* is a package of active safety systems designed to keep you and your passengers protected, wherever you are.

The Yaris Hatch range features Pre-Collision System with Autonomous Emergency Braking; Lane Tracing Assist; All-Speed Dynamic Radar Cruise Control; Automatic High Beam and Road Sign Assist.

(*refer to last page)

Pre-Collision System with Autonomous Emergency Braking, and Pedestrian and Cyclist Detection, and Intersection Turn Assist

The Pre-Collision System uses a radar sensor and a camera to determine whether a frontal collision with another vehicle, pedestrian or cyclist is imminent. This system has enhanced low-light capabilities to help detect pedestrians at night, and the camera and millimetre-wave radar can also detect cyclists during the day.

Intersection Turn Assistance is a new feature that has been added to the Pre-Collision System. It is designed to help prevent an accident during the daytime when turning right at an intersection and crossing the path of an oncoming vehicle or when a pedestrian is detected .

If the system detects a frontal collision may occur it will warn you with an audio and visual alert to urge you to take evasive action. It then prepares the Brake Assist system to provide maximum braking assistance, if you do not brake in time it may also automatically apply the brakes to help you avoid the collision or reduce the speed of the impact.

Road Sign Assist

Road Sign Assist monitors road speed signs using a camera and then displays the current speed limit to the driver via the Multi-Information Display. The system can be configured to provide an audio and/or visual alert if the vehicle speed exceeds a designated threshold above the posted limit.

Lane Tracing Assist

Lane Tracing Assist is designed to reduce the possibility of an accident due to your vehicle unintentionally drifting out of its lane. The system recognises visible white and yellow lane markings and can recognise the roadside even when there is no lane marking. If it detects the possibility of lane departure, it will urge you to steer back into the lane using a warning buzzer and a visual display. The system can also provide assistance by applying a small force to the steering wheel for a short time to help the driver keep the vehicle in its lane.

All-Speed Dynamic Radar Cruise Control

All-Speed Dynamic Radar Cruise Control helps make driving safer by keeping a constant pre-set distance between your vehicle and the vehicle ahead, enabling you to pay more attention to the road conditions and the vehicles surroundings.

All-Speed Dynamic Radar Cruise Control maintains an adjustable vehicle-to-vehicle distance by automatically accelerating up to a set speed, decelerating or stopping your vehicle to match the speed changes of the vehicle ahead without having to use the accelerator or brakes.

If the vehicle ahead stops, your vehicle will also stop while maintaining the appropriate vehicle-to-vehicle distance. After the vehicle ahead starts off, selecting +RES on the steering wheel or depressing the accelerator pedal will cause your vehicle to start off & vehicle-to-vehicle distance control will resume.

Automatic High Beam

Automatic High Beam is designed to help improve forward visibility when driving at night by making maximum use of the high beam headlights.

The system uses a camera to detect the headlights and taillights of vehicles ahead, or bright environments such as city streets, and automatically switches between high beam and low beam as required to avoid dazzling other drivers.

OTHER STANDARD SAFETY FEATURES

ACTIVE CORNERING ASSIST

EMERGENCY STOP SIGNAL

SECONDARY COLLISION BRAKE

HILL-START ASSIST CONTROL

EIGHT AIRBAGS

YARIS

EXPLORE THE RANGE

The Yaris GX - fun on the outside, smart on the inside.

Already adept at navigating the ins and outs of city life – not to mention a weekend roadie or two – the Yaris GX includes a number of innovative features that make driving even better.

On the outside, bi-beam headlights with LED Daytime Running Lights – new to the Yaris – don't just look sharp. They keep you safe and seen, even when that unpredictable New Zealand weather turns for the worse. Rain or in the dark? It's no match for the Yaris GX.

Already known for its agility around tight corners, the GX features automatic folding exterior mirrors and a reversing camera. These features are great for manoeuvring in and out of tiny driveways, and dealing with those awkward parking spots that city dwellers know so well. It's hard to have fun without peace of mind, which is why Yaris features the latest in Toyota Safety Sense technology. It's also the first Toyota with front centre aisle airbags to reduce the risk of front row passengers colliding during a side-on collision.

It's not just city life the GX is good for though, as All-Speed Dynamic Radar Cruise Control takes the pressure off long road trips. Plus, don't let its compact size fool you, whether it's a weekend away or a long drive with mates, the Yaris has space for all your stuff. Treats in arm's reach, an efficiently designed boot under the hatch, extra space when you fold the rear seats down, the Yaris has space to spare, and a place for everything.

In terms of tech, the stylish black interior boasts plenty. Your car connects seamlessly with your personal devices through Bluetooth, Apple Carplay® & Android Auto™. These features come standard and are all controlled by a handy 7-inch touchscreen display audio.

YARIS

ZR

The Yaris ZR takes everything up a notch

The Yaris ZR is above and beyond what you'd expect from a compact hatch. Brimming with slick design touches inside and out, as well as added tech features, it's a vehicle built to impress.

Right from when you hop in there's smart key entry and push button start, so you don't need to fumble around for your keys when you've got your hands full. The Multi-Information Display gives you all the information you need about your car, and the Head Up Display means you won't have to take your eyes off the road for basic info like speed and driving directions from the handy Satellite Navigation. It's all working together to make things seamless and safe for you.

The high grade interior is for those who like the finer touches, right down to the sports style seats and red stitching. Outside, 16" machine finished wheels come standard because, well, who doesn't like a sporty look?

The ZR model adds a host of extra tech and convenient features, too. Satellite Navigation and SUNA Traffic Channel* help you navigate around the city. A Blind Spot Monitor helps to detect vehicles in the adjacent lanes. Plus, having parking sensors with auto brake function makes fitting into those tight city parking spots even easier. All up, it's a car that takes care of the little things, so you can just have more fun when you're driving.

ACCESSORIES

Only Toyota Genuine Accessories are designed and manufactured to the same high standard as original parts. Fitting Genuine Toyota Accessories also ensures the integrity of your vehicle, with components tested to exacting standards for New Zealand conditions and backed by a 3 year or 100,000 kilometres* warranty. For more information on our Toyota Genuine Accessory range please contact your local Toyota Store or visit our website: www.toyota.co.nz

*Whichever comes first. Warranty valid from when accessory fitted, at time of new vehicle purchase at your Toyota Store.

Acrylic Bonnet Protector This clear acrylic Bonnet Protector is custom shaped to protect the front edge of the bonnet from stone chips, insects and paint damage from road debris. Made from high strength acrylic which is resistant to cracking and UV discoloration, and is supplied with stainless hard ware for secure attachment to the vehicle.

Acrylic Headlight Protectors Toyota Genuine Headlight Protectors provide added protection from insects, stone-chips and damage. Made from high strength acrylic which is resistant to cracking and UV discoloration, Toyota Genuine Headlight Protectors are easy to remove for cleaning and help you keep your stylish Yaris looking brand new.

Rear Bumper Protector This stylish Yaris branded, stainless steel Rear Bumper Protector protects the surface of your Yaris bumper from scratches and other damage when you're loading and unloading the cargo area.

Roof Racks Made using high-strength materials Toyota Genuine Roof Racks boost the cargo carrying flexibility of your Yaris. They are fully compatible with Toyota's range of Roof Rack accessories, which makes your adventure possibilities endless.

Weather Shields Slimline Weathershields help restrict the entry of wind and water when driving with windows in a slightly open position. This allows air flow through the cabin without exposing the occupants, interior and trim to the weather.

Rubber Cargo Liner Featuring a water-resistant surface, the Toyota Genuine Boot liner has been tailor-made to fit the boot of your Yaris and provide extra protection against dirt and spills.
