

PRIUS

Changing the world, one driveway at a time

When it arrived on the world stage almost 20 years ago, the Prius redefined what was possible in an everyday passenger car. It signalled the beginning of a new movement; one that strove to combine performance and practicality with a greater emphasis on both economy and the environment.

Today, after more than 8 million sales globally, the Prius remains Toyota's hallmark hybrid car. Featuring a dynamic, cutting-edge exterior design, an impressive array of standard technology and a high level of comfort and convenience onboard, the Prius is also more fuel efficient and more fun to drive than ever before.

Continuing to push the boundaries of development and design, the evolution of the Prius is a true technological adventure worth taking. Come with us and see for yourself.

Prius ZR

The distinctive stance and technological prowess of the Prius ZR is accentuated by its dynamic, modern exterior looks. Dramatic LED headlights and taillights, high contrast alloy wheels and a smooth, low-slung silhouette create a striking impression.

The Prius ZR features a premium interior that combines practical space and versatility with cutting-edge technologies, such as Toyota's intelligent S-Flow air conditioning system and the Qi wireless charging tray for compatible devices.

The stylish wrap-around dashboard, centrally housed instrumentation, colour Head-Up Display information system and supportive seats all serve to improve visibility, ease-of-use and driver and passenger comfort.

There remains nothing quite like a Prius, where form meets function with a dash of fashion.

- The roof tapers into a black c-pillar arrangement, giving the
 Prius a 'fastback' silhouette which brings to mind a low-slung
 coupe-like side profile
- 2 Stylish 17" contrasting black and silver resin alloys set the Prius ZR apart from the crowd
- Restyled and recessed LED headlights add a striking contemporary look to the Prius
- The entire front and rear bumper assemblies have been redesigned to improve aerodynamic airflow. The rocker panels below the Prius' doors have been restyled for maximum aerodynamic performance
- 5 Daytime LED Running Lights are standard on every Prius
- 6 The rear hatch opens wide to ensure the easiest possible access to your cargo items in the boot
- 7 Every Prius features a 'shark fin' antenna and an integrated rear spoiler

- The Prius ZR's modern interior features soft-touch trim panels with crisp, piano white accents and leather seat accents.

 The Prius ZR driver's seat features 8-way power adjustability and lumbar support
- 2 Intelligent S-Flow air conditioning is standard in every Prius.

 This system identifies which seats are occupied, and directs climate control air conditioning specifically where it is
- Every Prius receives a 10-speaker JBL Premium Audio package accessed through an intuitive 7" touchscreen display
- Head-Up Display technology is standard in every Prius and allows
 the driver to see important vehicle and hybrid system information
- 5 The Prius ZR features heated seats for the driver and front passenger; a perfect way to start the day on those colder mornings
- Driving in traffic is made easier in Prius ZR with Blind Spot Monitor (BSM) that alerts when vehciles are approaching from the rear.

 Another safety feature of Prius ZR is Rear Cross Traffic Alert that monitors for approaching vehicles when reversing

Prius GX

Whether your Prius GX is reserved for private use or multiplying the miles as a comfortable and reliable fleet vehicle, you'll go further on each tank of petrol with Prius' Hybrid Synergy Drive.

Toyota's proven hybrid system boasts a total power output of 90kW (petrol engine and hybrid system combined) and peak torque for the petrol engine of 142Nm. The Prius' Hybrid Synergy Drive has been developed and finessed through many years of engineering experience and ensures power and economy are delivered in equal measure so you get the most out of a tank of fuel, whatever your daily driving routine might be.

The environmentally-friendly Prius can achieve truly impressive combined fuel economy of 3.4-litres/100km*, thanks to Toyota's exceptionally clever thinking.

Favouring electric drive over internal combustion wherever possible, the spacious, reliable, economic Prius is a car that gives so much while taking so little.

- The 7" touchscreen at the centre of the Prius' console is your information and entertainment hub and also displays the reversing camera image. This system includes moving guide lines to help you reverse the Prius perfectly
- 2 An updated multi-function steering wheel provides safe and easy access to a number of vehicle functions, such as Bluetooth handsfree phone connectivity, Voice Control, and Dynamic Radar Cruise Control (DRCC) to help you maintain a pre-set distance between you and the car in front
- Every Prius features multiple driving modes to suit the driving environment. Power mode increases accelerator responsiveness, ECO mode helps to maximise fuel economy, while EV mode gives you clean emissions-free motoring utilising electric acceptable.
- The Prius GX features a Qi compatible wireless charging tray. Place a Qi compatible device on the charging pad and the battery will charge without the need for fussy cable connections
- (5) Every Prius features a Smart Key System, meaning you can keep the key conveniently in your pocket or bag as you approach, unlock, enter and start the vehicle

*Fuel consumption and CO₂ emissions will vary depending on driving conditions/style, vehicle condition and options/accessories fitted. Fuel consumption (combined ADR 81/02), CO₂ emissions (combined ADR 79/03).

The side-profile of the Prius is sleeker and longer, evoking an athletic stance

3 Green-tinted glass is used extensively in the Prius to help reduce UV light

The Prius GX features Bi-Beam LED projector headlights with automatic high beam

The wheel cap featured on the Prius GX's 15" alloys has been designed specifically to help improve the aerodynamic performance of the vehicle

6 The Hybrid battery is housed underneath the rear seat - this allows unencumbered luggage space and maintains a low centre of gravity

One of the standout features on every Prius is the dynamically designed

LED headlight cluster, LED fog lights and LED Daytime Running Lights (DRL)

The Prius' rear doors open wide, allowing for easy entry and exit from
the spacious interior

9 Each Prius model has the Hybrid Synergy Drive (HSD) system at its heart

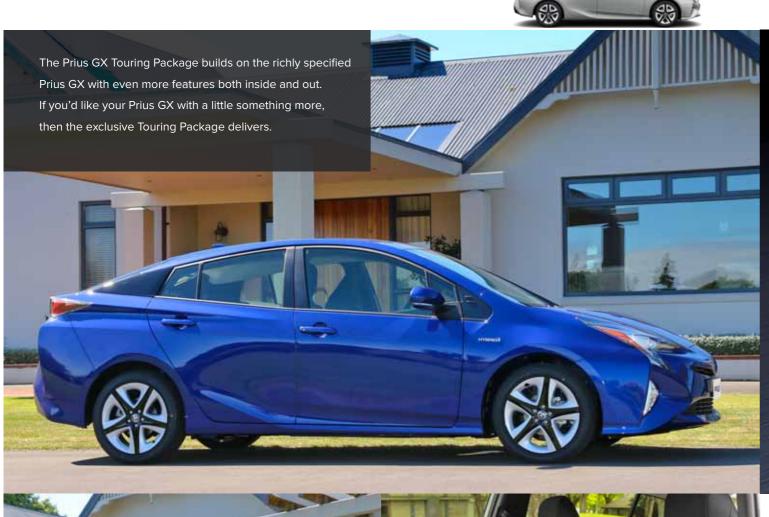

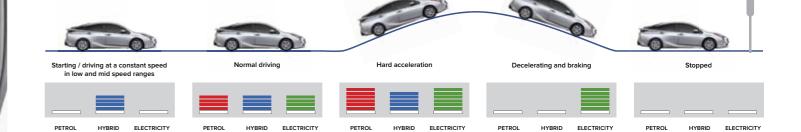

Prius Touring Package

Prius Hybrid Technology

- Step up to contrasting black and silver resin 17" alloy wheels with the Prius GX Touring Package
- The Prius GX seat trim is carried over to the GX Touring model
- Prius GX Touring adds an intuitive integrated satellite
 navigation system with SUNA traffic channel. The SUNA
 system broadcasts real-time traffic information and suggests
 alternative route information designed to keep you out of
 congestion (traffic information only available in some regions)
- The multi-function steering wheel in the Prius GX Touring is wrapped in high quality, genuine leather

- Toyota's well proven Hybrid Synergy Drive (HSD) is a full hybrid system. It includes a Permanent Magnet Synchronous Motor powered by a Nickel Metal-Hydride (Ni-Mh) battery.

 This is matched to perform in perfect harmony with a petrol driven combustion engine.
- Both the petrol and the electric motors in the engine management system can power the car alone or in combination allowing Prius drivers to enjoy responsive power with low emissions and ultra-low fuel consumption.
- 2 The Prius' hybrid battery is located under the rear seat,
 which helps create much more space in the boot; a bonus
 whether your Prius is family transport, your office on the go,
 or both
- The aerodynamically efficient new Prius has a drag coefficient of 0.24. The sculpted body panels, tapering roofline and under-floor panels combine to ensure no energy is wasted.

FOR MORE IMAGES AND DETAIL VISIT: toyota.co.nz/our-range/rav4

Toyota's world-leading engineering team
has spent years perfecting the efficiency of the
Prius' Hybrid Synergy Drive system. But naturally just
as much time and effort has gone into developing a suite of active
and passive safety equipment designed to be the best in the world.

There are comprehensive levels of safety equipment found in every Prius.

A reversing camera with active guidance lines ensures reversing manouvres have an added safety margin. Aiding vehicle control are Traction Control (TRC) and Vehicle Stability Control (VSC) which ensures safe driving in challenging conditions. The proven Anti-lock Braking system (ABS), gives you the confidence to control your ability to stop rapidly when you need to.

Prius occupants are protected with seven airbags. Child seats can be secured in the rear seat with 2 ISOFIX mounting points and 3 tether anchors.

Also standard across the Prius range is the comprehensive Toyota Safety Sense system. This suite of advanced technologies is designed to help support the driver's awareness and decision-making while out on the road. Toyota Safety Sense incorporates a Pre-Collision System (PCS), Lane Departure Alert (LDA) with Steering Control Function, Dynamic Radar Cruise Control (DRCC) with Automatic Brake Control and Automatic High Beam (AHB).

The Prius ZR features Blind Spot Monitor (BSM) and Rear Cross Traffic Alert (RCTA) systems. BSM uses radar to detect vehicles or larger objects present in the driver's blind spots (areas that cannot be seen using the outer mirrors alone). When a vehicle or large object is detected in a blind spot, it will inform the driver by illuminating the BSM indicator light in the corresponding outer mirror.

When reversing, RCTA detects cross-traffic that may intersect with your vehicle's path. When an approaching object (either a vehicle or pedestrian) is detected, RCTA sounds a warning and flashes the outer rear view mirror indicator lights.

controls becomes the Parking Assist Monitor when reverse gear is selected. The moving guidelines show orientation of the car in the available parking space.

of a collision to help enhance occupant restraint performance.

The force limiter function loosens the seat belts while maintaining the load to help mitigate the impact to the chest regions

of the front seat occupants.

Electric Power Steering (EPS) is vehicle speed sensitive so low speed manoeuvers require minimal effort while at highway speeds less assistance is provided. The turning circle is a city friendly 10.2m.

I US SPECIFICATIONS	PRIUS GX	PRIUS ZR
1.8 Litre, 4 cylinder. In-line type. 16 Valve Double Overhead Camshaft (DOHC) with Variable Valve Timing with intelligence (VVT-i).		
	·	•
Hybrid System - Nickel Metal-Hydride (Ni-MH) Battery, Permanent Magnet Synchronous A/C Motor	•	•
Maximum power - Petrol eingine 72kW at 5200 rpm; maximum torque 142Nm at 3600rpm.	•	•
Total combined system output (Engine + Hybrid System) 90kw	•	•
Fuel type - 91 octane or higher; fuel tank capacity 43L	•	•
Fuel economy - ADR 81/02 combined cycle*	3.4L/100km	3.4L/100km
CO ₂ emissions - ADR 79/04 combined cycle*	80g/km	80g/km
Exhaust emission standard	Euro 6	Euro 6
Transmission - Electronic Continuously Variable Transmission (ECVT) with EV, ECO, Normal and Power drive modes	•	•
Brakes - front ventilated and solid rear disc brakes; Electronically Controlled Brake system (ECB) with Regenerative Brake Control		•
Anti-lock Braking System (ABS) with Electronic Brake-force Distribution (EBD), Brake Assist (BA)		•
Traction Control (TRC) and Vehicle Stability Control (VSC) Hill-start Assist Control (HAC)		
Suspension - Front: MacPherson struts with stabiliser bar. Rear: Double wishbone with stabiliser bar		•
Steering - Vehicle speed sensitive power-assisted rack and pinion Electric Power Steering (EPS)		
Minimum turning circle 10.2m (tyre) and 2.84 turns lock to lock		<u> </u>
minimum uning circle 10.2m (yie) and 2.04 tanis lock to lock	•	
Wheels - Design and size	15" Alloy with aerodynamic covers	17" Alloy
Tyre size	195/65 R15	215/45 R17
Spare wheel	Temporary tyre	Tyre repair kit
Body coloured front and rear bumpers and outside door handles		•
Body coloured electric exterior rear view mirrors with side indicator lights, heater and auto folding/retract		•
Headlights - Bi-Beam LED with automatic levelling, light control system		
LED Daytime Running Lights (DRL) - LED Fog lights		
Air Spats - Front and rear		
LED high stop light and rear combination lights with Emergency Stop Signal (ESS)		
		•
Windscreen wipers - rain-sensing washer-linked variable intermittent. Variable intermittent rear window wiper	•	•
Air conditioning - S Flow Climate control with pollen filter mode	•	•
