Power through your day

Delivering plenty of power through a choice of 118kW/243Nm 2.7-litre petrol or 100kW/300Nm 3.0-litre turbo diesel engines, the Hiace has more than enough grunt for any trade task, even with a big load in the back. Hiace is economical to run as well, with transmission and engine-dependent combined fuel economy figures of between 8.1-litres/100km* and 10.8-litres/100km*. Thanks to EURO 5 emissions compliance, Hiace is a clean performer as well as a reliable one, with both engines specifically designed to cope with the stresses of long running hours demanded by commercial operators.

Built for business

The immensely popular Hiace ZL is available in full glass and half-panel variants offering great flexibility for business or pleasure. Hiace ZL half-panel van offers both extra privacy and extra seating. The five-seater half-panel van acts like an enormous wagon, giving passengers plenty of outward vision while providing huge cargo space with extra security at the rear. Despite the dimensions of the Hiace’s ZL or ZX cargo space, everything you stow inside remains within easy reach, thanks to the combination of a wide-opening rear door and dual sliding side doors that makes the most of access to the van’s centre.

Space for any trade

Hiace reaps the benefits of its large capacity carrying abilities, giving the bulk of interior space to the tools of trade that keep Kiwi businesses moving. There is plenty of usable space for anything from boxes to building supplies, pot plants to plumbing gear. With load space measuring 2930mm length/1545mm width/1335mm height for Hiace ZL glass variants, the Hiace provides a spacious interior to fill with whatever is crucial to your working week or weekend. Additionally every Hiace features Bluetooth hands-free phone connectivity and audio streaming, voice recognition, steering wheel audio controls, cruise control, powered front windows, tie-down hooks in the van cargo floor and UV reduction glass throughout.

* Petrol fuel consumption as per ADR 81/02 (combined cycle) and CO2 emissions as per ADR 79/04 (combined cycle); Diesel fuel consumption as per ADR 80/02 (combined cycle) and ADR79/04 & ADR30/01 diesel (combined cycle) are tested in a controlled environment.
Both variants of Hiace ZL have sliding doors on both sides for easy loading.

Hiace ZL driver and front passenger have an expansive view over the clean dash. The audio system includes a radio, MP3/WMA CD player, auxiliary input jack and USB connection, Bluetooth handsfree phone capability and audio streaming, voice control for audio/phone, three line text display, radio text, and two speakers.

The durable fabric seats and vinyl floor make for an easy-care environment.

Ample covered storage helps keep the interior clutter free, preventing reflective objects interfering with visibility.

The generously sized centre console is the perfect place to manage the many items you need to access throughout the working day.

The cab forward design neatly packages the engine under the front passenger seat.

A second row seat in ZL half panel and full glass manual variants provides extra seating capacity for three or can be folded for additional cargo space.

The Hiace line-up is world famous for its reliability record; reassuring when you drive for a living and being off the road due to mechanical problems isn’t an option.

It all starts with the Hiace ZL: an efficient and practically packaged van that just gets on with the job at hand, so you can get on with yours.

The Hiace ZL arrives with standard 15” steel wheels. Available in half-panel and full glass body styles, the recognisable exterior shape of the Hiace lends itself to promotional signage.

Left and right sliding side doors plus the high-lifting rear door give easy access to the shed-sized space inside. The extra width of ZX van means a panoramic view of the road ahead. Hiace ZX is all about large loads but the driver and passenger aren’t forgotten with easy access to the supportive seating. Whether you choose manual or automatic the dash mounted gear lever maximises interior space. The centre console in ZX vans will handle all the small items you need to keep close to hand. The centrally housed audio can handle phone calls and accepts 3.5mm aux and USB connections. With its large load area the Hiace ZX van easily stows and carries standard building products. The low level loading, rear step bumper and tie-down hooks makes ZX the large van of choice. With ample space between the rear wheel arches, standard building panels fit with ease.

Hiace Minibus loads from the left sliding door for passenger safety.

The rear passenger area accommodates eight passengers on the right and two passengers in single seats on the left.

For passengers seated in the rear there’s a clear pathway between seats for an easy exit.

Interior comfort is paramount for happy, relaxed passengers – cool air is delivered through ceiling vents. Passengers travel in comfort and safety thanks to all seats having 3-point ELR seat belts.

Hiace Minibus also features 3 x Tether Anchors and 3 x ISOFIX points.

For relaxed driving on long journeys cruise control is a welcome feature.

As well as having plenty of space inside, the Minibus side door has been designed with ample head room for easy entry and exit.

**FACTS AND FIGURES**

- **Hiace 4 door Minibus**
- **5-speed manual transmission**
- **12 seats**
- **3.0L Diesel engine**

**Hiace Minibus in French Vanilla**

Need to get colleagues, the sports team or the extended family somewhere safely and comfortably? The popular and practical Minibus is the proven vehicle for the job. With individual seats for all 12 occupants, wide-opening doors for easy access and the powerful 3.0-litre turbo diesel engine taking care of the hard work, the Hiace Minibus remains the best way to travel in numbers.

Overall length: 5380mm
Overall width: 1880mm
Overall height: 2285mm
Wheelbase: 3110mm
Seating capacity: 12
Kerb weight - manual: 2185-2205kg
Kerb weight - auto: 2195-2215kg
Gross vehicle weight: 3250kg
Max towing capacity - braked/unbraked: 1400/700kg
Hiace ZL full glass vans have achieved 4-stars in the ANCAP safety test.

Front seat pre-tensioners instantly tighten the seat belts at the time of a collision to help enhance occupant restraint performance. The force limiter function loosens the seat belts while maintaining the load to help mitigate the impact to the chest regions of the front seat occupants.

1. Front seat occupants are protected with airbags in the front dash and steering wheel.
2. Each Hiace features a reversing camera with static guide lines and a clever colour monitor camera embedded in the rear view mirror, offering extra convenience in confined urban delivery zones and added peace of mind when reversing in residential areas.
3. VSC (Vehicle Stability Control) helps you correct a loss of control by detecting if the vehicle is starting to skid or slide. By comparing the vehicle's direction of travel with your steering, acceleration and braking inputs it can tell if you are deviating from the intended direction. VSC then warns you, reduces engine power and controls the brakes to help you correct the situation.

Your Hiace is essentially your mobile office, so offering the certainty of a safe driving environment for your busy day is a high priority for Toyota. Every Hiace features a comprehensive standard safety package, including Vehicle Stability Control, Traction Control, Brake Assist and Hill Start Assist Control.

In the cabin, occupant safety and comfort is paramount, with large and convenient storage for lunchboxes, workbooks and mobile devices. Five-seater models also sport a roomy seating environment in the rear featuring 3-point, Emergency Locking Retractor (ELR) seatbelts fitted in each outer seating position with a 2-point centre seat belt. Hiace Minibus features 3 x Tether Anchors and 3 x ISOFIX points.

Safety and practicality in one proven package

Make Hiace your own

With a Hiace on your fleet, there’s also a range of Toyota Genuine Accessories that will allow you to customise your Hiace to suit your needs.

Only Toyota Genuine Accessories are designed and manufactured to the same high standard as your original part. Fitting Genuine Toyota Accessories also ensures the integrity of your vehicle, with components tested to exacting standards for New Zealand conditions and backed by a 3 year or 100,000 kilometres* warranty. "Whichever comes first. Warranty valid from when the accessory is fitted, at time of new vehicle purchase at your Toyota Store.
